Could it be more than occasional constipation?

Time to have a deeper conversation with your adult patients with IBS-C

SPONSORED BY ABBVIE

MONDAY

MAY 23, 2022

11:30AM-12:15 PM PST

Location: Product Theater 1 - Hall B2

DR. SUSAN LUCAK

IBS-C impacts nearly 11.5 million Americans. It's a chronic condition that is characterized by constipation, and burdensome symptoms like abdominal pain, bloating and discomfort. Research shows many patients are uncomfortable discussing the totality of their symptoms with their healthcare provider. Come to a clinical review to learn more about a treatment that may help adults with IBS-C.
